LFTFC Install and Uninstall Instructions

Downloading LFTFC

If you have an earlier version of LFTFC installed on your computer, you should uninstall that version before proceeding with installation of the current version. Refer to LFTFC Uninstall section for steps to uninstall.

Download LFTFC from the LF website at <https://landfire.gov/resources/lftfc>.

Installing LFTFC

This has been tested with 3.0-3.5 ArcPro, and more recent versions.

1. Uninstall any previously installed LFTFC toolbars.
 - a. Refer to Uninstall Section to uninstall.
2. Installing - Run Setup_LFTFC_####.bat
 - a. Make sure ArcPro is closed.
 - b. Double left-click to run "Setup_LFTFC_####.bat".
 - c. This copies required files to "C:\Landfire\LFTFC_Pro".
 - d. The black command window will automatically close (approx. 2 minutes).
3. ArcGIS Add-in window opens.
Click Install Add-in.

- Click OK.

- Start ArcPro and LFTFC_Pro are visible in the Add-In tab.

Uninstalling LFTFC

- Start ArcPro.
 - Select Project at the top of the screen in the menu bar.
 - In the Project menu bar, select Add-in Manager.

- Select LFTFC_Pro Add-In located under My Add-Ins.
- Click Delete this Add-In.
- Click Close.
- Close ArcPro.

2. Open Windows Explorer.
 - a. Navigate to the “(C:\Landfire)” directory.
 - b. Delete the folder named Landfire_Pro.
3. Start ArcPro.
 - a. LFTFC_Pro toolbar is gone.
 - b. Close ArcPro.
